

October 10, 2014

As FIS introduced new rules for U14 and U16 racers for 2014/15, a proposal was passed at the 2014 USSA Congress in the Alpine Sports Committee to implement ski dimension regulations down to the U14 level of USSA ski racing. These standards were created in cooperation with representatives from the ski industry to progress athletes gradually from U14 to U18 standards, and were distributed widely in June 2014.

Unfortunately, at this time, the recommended skis are not widely available for purchase everywhere across the country. Given the difficulty some athletes are having acquiring skis that meet the new standards, a recommendation has been made to the Alpine Sports Committee to amend the equipment rules to the following:

**U16 and U14 athletes may use the equipment of their choice in 2014/15, EXCEPT for athletes competing at the U16 National Championship and Assessment Project, where the standards in the matrix must be adhered to. In addition, any athletes participating in NTG projects in Europe will also be expected to use skis conforming to these standards.**

It is the firm conviction of the coaching staff of the USST and USSA development staff, that athletes wishing to pursue ski racing at the FIS level should follow the guidelines passed in May.

Maximum Boot Height	43 mm		43 mm		43 mm		43 mm <b>required</b>		43 mm <b>required</b>		45 mm	

\* In USSA U18 (16 years old) and older racing, athletes may use equipment that conforms to either the rules as outlined for USSA racing or as outlined for FIS/ENL racing. Athletes are encouraged to use equipment that conforms to FIS/ENL to enhance their adaptation to those specifications.

\*\* U12 and younger athletes should limit skis based upon the recommendations in the Course Setting matrix. U12 - 2 pairs (SL, GS), length skill/size appropriate. U10 - 1 pair (multi-event), length skill/size appropriate.

\*\*\* USSA Masters rules conform to the FIS Masters equipment rules. USSA recommends that competitors in USSA Masters events compete on equipment designed for the particular discipline (DH, SL, GS, SG), but does not make any recommendations in regards to ski length, radius or profile width.

\*\*\* For FIS Masters Competitions, equipment rules in regard to ski length (except SG), radius and profile width are recommendations. The minimum ski length for SG skis is compulsory for MAS races. No length, width or ski radius restriction for ladies above 55 and men above 65 years of age. The FIS recommendations for ski length, ski radius and profile width can be found in the current *FIS Specifications for Competition Equipment*.

\*\*\*\* U16 and U14 athletes may use the equipment of their choice in 2014/15, EXCEPT for athletes competing at the U16 National Championship and Assessment Project, where the standards in the matrix must be adhered to. In addition, any athletes participating in NTG projects in Europe will also be expected to use skis conforming to these standards. It is the firm conviction of the coaching staff of the USST and USSA development staff, that athletes wishing to pursue ski racing at the FIS level should follow the guidelines passed in May.
